SFDR WEBSITE DISCLOSURES

No consideration of sustainability risks in the Company's investment decision-making process – website disclosure

The Company operates on a delegated basis in respect of its investment management operations. As a result, any integration of sustainability risks into the Company's investment decision-making process is dependent on the policies and procedures adopted by the Company's investment manager, Progressive Capital Partners Ltd., and any sub-investment manager that may be appointed to provide discretionary investment management services in respect of a sub-fund of the Company (the "Funds"). A sustainability risk is an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. Given the nature of the investment strategies pursued on behalf of the existing Funds and the investments they generally hold, none of the Company, the Investment Manager or the Sub-Investment Manager currently integrates sustainability risks into its investment decision-making process for the purposes of Article 3(1) of the Sustainable Finance Disclosures Regulation ("SFDR").

No consideration of sustainability adverse impacts - website disclosure

The Company does not consider the adverse impacts of its investment decisions on sustainability factors, within the meaning of Article 4(1)(a) of SFDR, for the time being. The Company does not currently do so, among other reasons, due to the size, nature and scale of the Funds, and the nature of the investment strategies pursued on behalf of the Funds, which principally involve investments in financial derivative instruments over a short-to-medium time horizon. In addition, the final regulatory technical standards, which set forth the scope of "principal adverse impacts" and the corresponding mandatory reporting template, have not yet been adopted by European legislators, which makes voluntary compliance with Article 4(1)(a) challenging. The Company's position on this matter will be reviewed at least annually.

Remuneration Policy - website disclosure

The Company's remuneration policy takes into account compliance with its policies and procedures related to the integration of sustainability risks in its investment decision making process, to the extent relevant for any particular sub-fund of the Company.
